

12th SYMPOSIUM ON ATP1A3 IN DISEASE

14 – 15 November 2024

Espai Modernista Sant Pau
Barcelona
Spain

Welcome to the **12th Symposium on ATP1A3 in Disease**, a scientific meeting that traces its roots back to the seminal discovery of the ATP1A3 mutations in Alternating Hemiplegia of Childhood (AHC). The inaugural symposium in Brussels in 2012 marked the beginning of a profound scientific journey for the AHC and ATP1A3 community. It served as a pivotal moment where researchers, clinicians, patients, and advocates came together to embark on a collective quest to understand ATP1A3-related diseases. Since then, the symposium has become a beacon of collaboration, attracting diverse perspectives and expertise from around the world.

Join us on **14-15 November 2024**, as we gather for the first time in Spain at the historic **Recinte Modernista Sant Pau in Barcelona**. Against the backdrop of this vibrant city, we'll continue to explore the complexities of ATP1A3, from gene mutations to potential treatments, in an atmosphere of collaboration and shared purpose.

From Rome to Tokyo, from Chicago to Barcelona, each meeting has added layers of insight and momentum to our collective efforts. As we prepare for this latest chapter, we look forward to welcoming you. Your involvement is crucial to our shared mission.

VENUE

ACCOMMODATION

Head, Pediatric Neurology and Neurophysiology Department
 Hospital Sant Joan de Déu
 (Barcelona, Spain)
 Associate Professor, Barcelona University
 Member, International Consortium for Research on AHC (IAHCRC)

Department of Pharmacology
 Northwestern University
 Feinberg School of Medicine
 (Chicago, US)
 Research Focus:
 Pathophysiology of Alternating Hemiplegia of Childhood (AHC) using human neuron and mouse models
 Current Work: Developing potential gene therapies
 Host: ATPIA3 in Disease Symposium, Chicago (2018, 2023)

Lyon University Hospital
 (Hospices Civils de Lyon, France)
 Department of Clinical Epileptology, Sleep Disorders, and Functional Neurology in Children
 Deputy Co-Ordinator, International Consortium for Research on AHC (IAHCRC) (since April 2022)

VENUE

ACCOMMODATION

Hanne Poulsen, PhD

Molecular Biologist

Aarhus, Denmark

Research Focus: Molecular effects of disease-causing mutations on Na,K-ATPase function

Primary Methodology: Electrophysiology

Mrs. Bridget Vranckx

President of AESHA (AHC Spain)

Mr. Marc Gambús Moro

Board member of AESHA (AHC Spain)

Programme

The 12th Symposium on ATP1A3 in Disease will be held on 14 - 15 November at the Espai Modernista Sant Pau in Barcelona, Spain. This will be a hybrid event discussing the progress in understanding the **basic science**, developments in **translational science** – from ongoing treatments, including gene-based and pharmacological and functional treatments, to clinical trials for mouse models and biomarkers – and what matters for **families**.

Here is a taster of the programme topics that will be covered during this two-day conference. The full programme schedule will be released in the coming weeks.

Venue

Recinte Modernista Sant Pau

[Official website](#)

This architectural complex, declared a World Heritage Site by UNESCO, is one of the most important jewels of Catalan modernism and one of the most popular tourist attractions in the city.

The Sant Pau Art Nouveau Site was originally a hospital, but today it hosts a number of exhibitions and cultural events throughout the year. The buildings on the grounds, designed by architect Lluís Domènech i Montaner, are a perfect example of the modernist style and are full of artistic and decorative details that make them unique.

How to get there?

[C/ de St. Antoni Maria Claret, 167, Horta-Guinardó, 08025 Barcelona](#)

M Metro: Sant Pau – Dos de Maig (L5- BLUE LINE)

B Bus: H8, 19, 47, 117, 192
